## A WORD TO THE PUBLIC.

It is now some ten years since our public advent. At that time we promised the public to become as useful a member of the newspaper family as our ability and the limits of our field of operation would permit; that we have not forgotten or neglected that promise, the many complimentary notices of the *press*, from time to time bear testimony, but to us the most agreeable and convincing evidence of the fact is found registered upon our Subscription Books, where the financial and commercial world of our Union are fairly represented.

From our advent to the present time, we have steadily adhered to the principles which called us into existence:—*War to all false systems of Banking*, whether practised by individuals or authorized by State Legislatures. And in furtherance of these principles, we have ever been foremost in denouncing every species of shiplastering and unsafe systems of banking;—we have invariably claimed the most ample security from banks and bankers to cover their circulation and free the bill holder from any possible loss. And when irresponsible and designing men have forced their promises upon the public, we have branded them with a (p.) *doubt* until they either secured their circulation or brought it to a speedy terminus. But enough of what we have done; we wish to tell our subscribers and the trading public why we have issued this work of autographs.

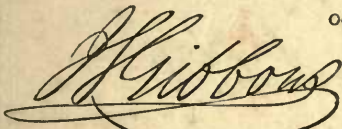

This work grows out of a desire to be *useful*, and the determination that while we *do* issue a reporter it shall be, not merely a bank note reporter, but *The Bank Note Reporter*; and hence anything pertaining to bank notes or other species of money which can be serviceable to our subscribers and the trading community, we are determined to place before them.

We are aware that exceptions may be taken to the general utility of any work of this kind, and we cannot claim for our book an exemption from such exceptions; indeed, we prefer retaining the book on our shelves, rather than have it sold on a misrepresentation of its merits. What we do claim for the book is, that (as a test of signatures), it is equivalent to ONE BILL on each bank therein represented. Whether, as such, it will prove acceptable to the public, it is for them to determine. We feel satisfied that we have done our part of the duty, and the rapidity with which our FIRST FOUR EDITIONS went off, induces us to believe that the public are willing to do theirs.

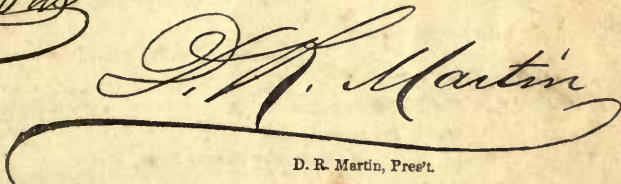

Cases may be noticed wherein the names in this book do not correspond with those in the *Reporter*. The difference is owing to some recent changes, as it sometimes happens that an officer may not sign a circulating note for a year or more after his appointment. Such names are marked by an asterisk. (\*)

Fac-simile signatures of the officers of Banks lately organized, and not in the body of this book.

—o—  
Ocean Bank, N. Y.
